

1. All dimensions are in millimetres unless stated otherwise.
2. Do not scale drawings. Verify dimensions take precedence.
3. Verify all dimensions, levels and site conditions on site before works commence.
4. Report all drawing discrepancies to the Architect before commencing affected works.
5. Read all drawings with the latest architectural, structural and consultant drawings, specifications and schedules.
6. Execute all works in accordance with the approved drawings, specifications and consultant instructions.
7. Obtain all relevant statutory approvals and permits before construction.
8. Obtain Architect's approval for all materials, finishes, fixtures and fittings where required.
9. Construct all structural elements in accordance with the Structural Engineer's drawings. Do not alter without approval.
10. Coordinate all building services with the architectural and structural drawings before installation.
11. Use only the latest authorised drawing revision for construction.
12. © Neo Studio Ltd. All rights reserved. Reproduction or unauthorised use is prohibited.
